# JOHN FRY'S FOOD TRUCK EXTRAVAGANZA

USER MANUAL

JFFTE is an application that will help you find the food truck of your choice. This small manual should tell you everything you need to know to use the app.

Start by opening the application either through a link on the web, or from the jffte.html file on your computer. The app automatically changes from portrait to landscape orientation based on the size of your screen. Screenshots in this manual are shown twice; once in landscape mode and once in portrait mode.

When you first open the application, you will see a list of all the food trucks on Drexel's campus (on the right in landscape mode, and on the bottom in portrait mode). You will also see a map of the University City area:

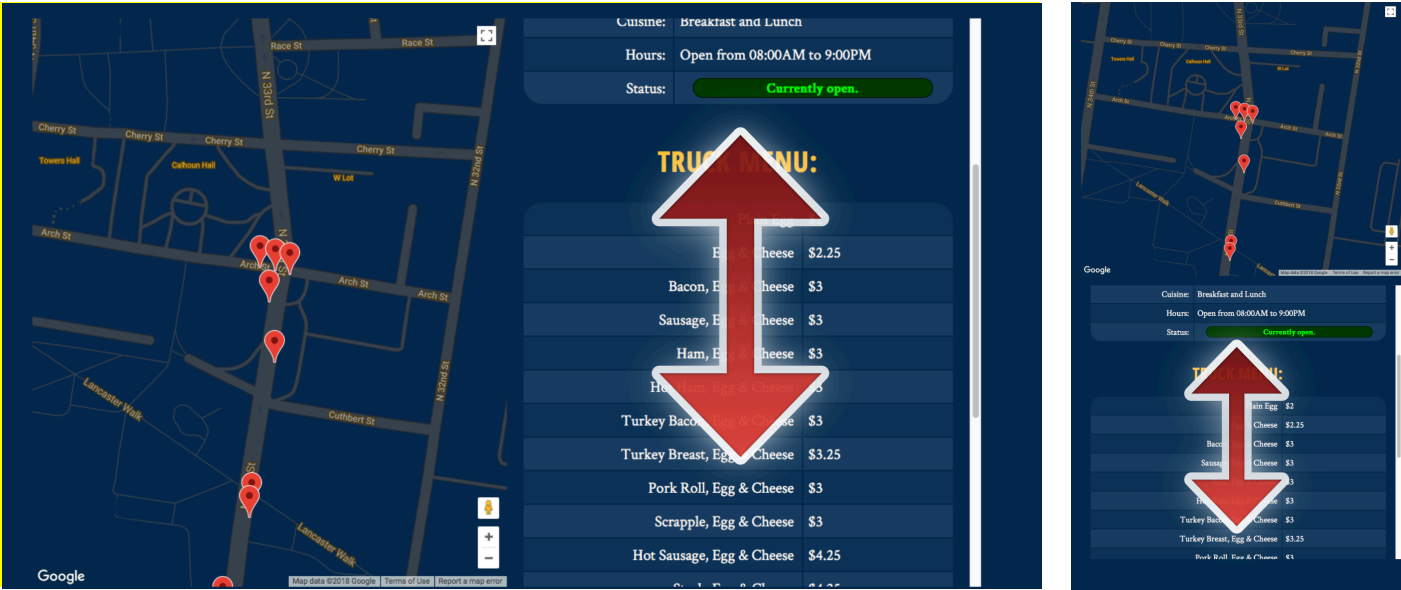

On a phone, you can reposition the map by clicking and dragging, and you can scroll by pinching inwards and outwards with your fingers. On a computer, this is done by clicking and dragging, and by scrolling the scroll wheel with your mouse, respectively.

Each food truck is represented on both the list and the map. To see information about a truck, click or tap its title in the list, or a marker on the map. Information about the truck will be displayed, including all the items on the menu, the address of the truck, and the hours of operation. This menu is scrollable (with the scroll wheel on your PC or by dragging your finger on a phone).

To see information about another truck, you can return to the previous screen by clicking or tapping the "Back to main menu" button, or by clicking on another marker on the map. You can click any marker on the map you want at any time to see what truck it represents.

To exit the app, simply close your browser window.
